**U.S.-Japan Space Forum:**  
***Japan-U.S. Space Cooperation in the Abe-Trump Era***

Hosted by Kyoto University

---

Please join members of the U.S.-Japan Space Forum for a discussion on U.S.-Japan space cooperation in the context of the new American president, Japan and America's global leadership in an era of global uncertainty, heightened regional security concerns, and increasing space competition from traditional and non-traditional space players.

The U.S.-Japan Space Forum is a standing committee of Japanese and American space policy experts, meeting regularly to examine critical developments and opportunities for bilateral and multilateral space-related activities. Reflecting the increasingly important role of the private sector in national space capabilities, the Forum integrates the perspectives of a wide array of experts, including corporate representatives alongside academic and government players, in an informal environment that is conducive to creative and frank discourse. The group ultimately aims to influence a space policy that yields a stronger basis for bilateral space collaboration and reflects both the evolving global security circumstances and the increasing importance of a robust and sustainable private sector to national space activities.

The seminar is hosted by Kyoto University. The U.S.-Japan Space Forum is sponsored by Boeing, IHI Aerospace, Lockheed Martin, MELCO, MHI, NEC, and Raytheon, with support from the U.S. Embassy Japan.

**Date:** Monday, March 6th, 2017 16:00-18:00  
**Location:** Higashi-Ichijo-kan, Graduate School of Advanced Integrated Studies for Human Survivability, Kyoto University  
〒606-8306 Kyōto-fu, Kyōto-shi, Sakyō-ku, Yoshida Naka-Adachi-Cho 1
